

Project Initialization and Planning Phase

Date	04 July 2026
Team ID	
Project Name	OptiCrop
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Farmers often face difficulty in selecting the most suitable crop due to changing soil and environmental conditions. Lack of proper guidance on soil nutrients (N, P, K), temperature, humidity, pH, and rainfall can lead to poor crop yield and inefficient use of resources. There is a need for a smart system that analyzes these factors and recommends the best crop to improve productivity, resource efficiency, and sustainable farming.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An agricultural researcher	Analyze crop and environmental data	I don't have an easy way to study crop patterns	Large amounts of agricultural data are difficult to analyze	Challenged to make accurate decisions

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An agricultural researcher	Analyze crop and environmental data	I don't have an easy way to study crop patterns	Large amounts of agricultural data are difficult to analyze	Challenged to make accurate decisions
