Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Opens the OptiCrop application. • Enters soil parameters (N, P, K, pH). • Enters environmental details (temperature, humidity, rainfall).	• Submits the input data. • Views the recommended crop and suitability analysis. • Reviews productivity insights and recommendations.	• Selects the recommended crop. • Implements the suggested farming practices. • Monitors crop growth and yield improvements.
Touchpoint <i>What part of the service do they interact with?</i>	• User registration/login page. • Soil & climate data input form. • Dashboard interface.	• Machine Learning prediction engine. • Recommendation dashboard. • Crop suitability report page.	• Recommendation reports. • Performance dashboard. • Historical data and analytics section.
Customer Thought <i>What is the customer thinking?</i>	• "I hope this system recommends the best crop for my land." • "Is my soil data correct?" • "Will this improve my yield?"	• "Why is this crop recommended?" • "Are my environmental conditions suitable?" • "Can I trust these recommendations?"	• "Will this recommendation increase my productivity?" • "Can I reduce fertilizer and water usage?" • "How can I achieve better profits?"

Customer Feeling <i>What is the customer feeling?</i>	Curious and hopeful.	Confident, informed, and satisfied.	Happy, productive, and motivated to continue using the system.
Process Ownership <i>Who is in the lead on this?</i>	Farmer/User, supported by the OptiCrop system.	Machine Learning prediction engine and application backend.	Farmer/User with support from the OptiCrop analytics and recommendation system.
Opportunities <i>How can we improve this stage?</i>	• Simplify data entry. • Auto-fill weather information. • Provide multilingual support.	• Explain recommendation reasons. • Display confidence score. • Provide fertilizer and irrigation suggestions.	• Send seasonal reminders. • Track crop performance over time. • Offer personalized farming tips and future recommendations.
